

MACD Zoom Buy/Sell Metatrader 4 Forex Indicator

The MACD Zoom buy/sell forex indicator works on the traditional MACD principle but comes with some extra interesting functions.

The indicator has a built-in zoom function that works very well.

The zoom function can be set to manually or automatic.

Buying and selling pairs with the indicator is very simple.

A buy signal occurs when the MACD Zoom indicator crosses back above the zero level from below.

Vice versa, a sell signal occurs when the MACD Zoom indicator crosses back below the zero level from above.

Feel free to play with its zoom function.

Example Chart

The EUR/USD H1 chart below displays the MACD Zoom Metatrader 4 forex indicator in action.

Basic Trading Signals

Signals from the MACD Zoom MT4 forex indicator are easy to interpret and goes as follows:

Buy Signal: Open buy trade position when the MACD Zoom indicator turns back above the zero level from below.

Sell Signal: Open sell trade position when the MACD Zoom indicator turns back below the zero level from above.

Tip: Utilize the MACD Zoom indicator together with trend indicators for more precise buy and sell trades.
